

## **SECURITY MATTERS**

Apart from the physical security measures at Welgelegen Estate (WE), the Welgelegen Homeowners Association (WHOA) has contracted Niqua Security to provide security services in WE. However, despite the security as provided by WHOA, every home owner is still responsible for his/her own security.

Please take note of the following requirements:

- All residents must be registered on the security system.
- All domestic workers and gardeners must have a SAP69 police clearance and they must also be registered on the security system. Please contact the Estate Manager (EM) for more detail.
- All gardeners must wear reflective "bibs" while working.

The above requirements are of extreme importance and all residents must strictly adhere to this.

Contractors to work at residences also need to be registered on the security system beforehand. This may / may not apply to quick and once-off visits by a service provider. Please contact the EM for more detail.

No drones allowed unless approved by the EM.

Visitors must have positive identification available in order to obtain access to WE. Kindly inform security beforehand of expected visitors.
